— Joint effort brings acclaimed play —

The life of Emily Dickinson will be portrayed when UT Tyler and Tyler Junior College jointly present William Luce's play "The Belle of Amherst" on April 6 at 7:30 p.m. at T.C. Wise Auditorium.

The one-woman show will

feature in person Jane Trechse in the role of the reclusive poet from Massachusetts.

Mrs. Trechse, 43, is from Birmingham, Alabama. She has been acting on the stage for 20 years, first playing the role of Miss Emily

at Birmingham's Festival Theatre in the fall of 1979.

Trechse later took the play to the University of Alabama and more recently has been touring Alabama.

Her performances have been

lauded highly in an article in Southern Living Magazine, where she is described as "a poet, entertainer and mystic."

Trechse has spent some time at Amherst, home of Emily Dickinson, to better prepare herself for the part in the play.

Frank Trechsel, husband of the actress, directs the play.

Tickets are free to UT Tyler and T.C. students with student I.D.'s and are available at Room 111 of the University Center and at TJC. Price is \$3.00 for adults and \$2.00 for children.

Songwriters hold workshop

A Nashville Songwriters Association Member's Workshop will be held from 9 to 4 p.m. Saturday, March 27, in UC 211.

The Music Student's Association and the Press Club are sponsoring the event, according to Terry Shirley, Press Club treasurer.

NSAI is a non-profit organization which voluntarily sets out to advance, promote and benefit

composers and authors of musical compositions.

"This will be the second NSAI workshop in Tyler," Mrs. Shirley said.

The purpose of the local workshops is to encourage those who write lyrics or compose music.

"There is no charge for the workshop and no pressure will be

applied for anyone to join NSAI," Mrs. Shirley said.

"Anyone is welcome but a music and journalism students are especially encouraged to attend," Mrs. Shirley said.

At the noon lunch break, each one is responsible for his own lunch. Bring a sack lunch or plan to go off campus to eat.

Tri-Beta plant sale scheduled

Airplanes will be soaring from 11 a.m. to 2 p.m., March 29-April 1 in the University Center.

Beta Beta Beta's Spring Plant Sale will feature the green and white striped hanging plants along with begonias, geraniums, impatiens, Swedish ivy and

others. Prices will range from \$2.50 to \$8.

Proceeds will go toward establishing a permanent scholarship fund for junior biology majors," said Dr. James Stewart,

biology department chairman. Students have been growing the

plants in the campus greenhouse since fall 1980. Continuous propagation has resulted in a large healthy stock that has been "growing like weeds," he said.

Tomato and pepper plants also will be available for a nominal amount.

DOROTHY TUCKER AND DR. BETTY N. ANDERSON

Education major sets statewide priorities

By LAURA HUGHES
Staff Writer

Dorothy Tucker, junior special education major from Longview, was elected president of the Student Council on Exceptional Children.

When Dr. Mac Moseley, special services department chairman, suggested that she try for the office, "I thought he was kidding," Tucker said.

With the support of Moseley and education faculty member Dr. Betty N. Anderson, Tucker became as serious about the idea as they were.

Like most overnight successes, however, Tucker has worked persistently to reach her goals. Much of her inspiration comes from being a concerned parent.

"I have five children, one of whom is learning disabled," Tucker said. "After seeing my daughter struggle through 12 years of school, I understand the problems parents and children face."

Tucker attends UT Tyler two days a week and substitutes teaches both regular and special education classes for the White Oak School District.

The Marshall native began working as an instructional aide in special education in 1970 when the Marshall Independent School District piloted a program for the learning disabled. In 1972 the program selected her as part of a consultant team that helped other schools in East Texas set up special education programs.

"This was speaking, planning and teaching experience I couldn't get anywhere else, experience that got me ready for school," said Tucker.

Without question, that school was UT Tyler.

"Everyone I worked with talked about UT Tyler and its excellent education department," she said. "I never wanted to go anywhere else."

Going back to school after working and raising a family

hasn't been easy, but "it means a lot more," Tucker said. "I went to college (one semester at North State University in 1955) right after high school just because I didn't know what else to do."

Now she said her philosophy is "It's never too late to fulfill your goals. Later you're more task-conscious; you have more drive and you persevere. You know what you want."

What she wants as president of CEC is to establish better communication with the organization.

"I want to put together a monthly newsletter to help the campuses within the state put together," she said. "Everybody has good ideas to share, but thus far the conventions have been the only chance to hear about them."

Better communication, she believes, can further the organization's purpose to acquaint special education students with current educational trends and new legislation.

A student from each campus was appointed at the state convention to be responsible for reporting for the newsletter. Jim Gear will be reporting UT Tyler activities.

For Tucker, this summer will be a time for returning to another part of education she loves—teaching swimming. She is a certified American Red Cross water safety instructor/trainer who has taught the handicapped in the Red Cross Learn-to-Swim Program in Marshall.

"I taught last summer for the Gregg County Association for Retarded Citizens in Longview, and I hope to do so again this year," she said.

Tucker hopes to have a full-time job this fall teaching in a learning disabilities unit resource room but will continue her own education.

"After I graduate with a generic certificate in special education, I'll start working toward a master's degree at UT Tyler, of course," she added.

Advertising director speaks to UT-Tyler Press Club

William E. Zeiss will speak to the UT Tyler Press Club at 2 p.m. today in HPR 261. He is the advertising director for The Tyler Morning Telegraph, Tyler Courier-Times and the Tyler Courier-Times Telegraph.

Zeiss will discuss "Careers in Newspaper Advertising." He has been with the Tyler paper 20 years.

After attending Texas A&M, he received his bachelor's and

master's degrees from East Texas State University.

The advertising director frequently speaks to various colleges, universities and other organizations.

Local CEC makes mark

By TERRY SHIRLEY
& LAURA HUGHES
Staff Writers

The Department of Special Services at UT Tyler is making a mark across the state and region according to Dr. Mac R. Moseley, chairman of the department. Two presidents of statewide organizations come from the department.

Dorothy Tucker, a junior special education major from Longview, was recently elected president of the Texas Student Council for Exceptional Children. Dr. Betty N. Anderson, special education faculty member and adviser for students of the CEC Chapter, is serving as president of the Texas Council for Exceptional Children.

"One advantage of being president of the state organization is the visibility it provides the University," Dr. Anderson said.

Another advantage is knowing other professionals around the state. This assists in getting placements for students, she said.

The mid-winter conference for the Texas SCEC was held on the UT Tyler campus in January.

"These conferences are to aid in professional growth. The bottom line is to get the CEC students of all campuses together to interchange ideas," Mrs. Tucker said.

As president of SCEC, her responsibility is to coordinate organization activities between campuses.

Mrs. Tucker believes that UT Tyler has an outstanding special services department.

"This department keys in on individualization and realizes that every child doesn't learn the same," she said. "and that you need to look at each child individually."

Dr. Anderson agrees with Mrs. Tucker about the personal interest stressed at UT Tyler.

"Educators throughout the state are using the term 'personalization of education.' This is something we have been doing in special education all the time," she said.

Basically, CEC is designed to promote services and teacher preparation in areas such as hearing, visual, speech, mental retardation and emotional problems.

At this time, Dr. Anderson is particularly concerned with vocational education for the handicapped and how it ties into the regular vocational program.

One concern CEC has at the moment is with decreasing membership. Because of an increase in national dues, many people did not continue their membership.

One fund-raising plan to help the Foundation to continue to expand services to handicapped and gifted children is the "Buck-a-member" appeal.

"The plan is to send one dollar for each member in each chapter," Dr. Anderson said.

She said that the concern of the CEC, as well as the entire UT Tyler Special Services Department, is for the students who need something extra or different from what is offered in the regular classroom.

Editorials

Spring has Sprung

An epidemic of spring fever has spread with rapid speed over the campus. This highly contagious disease favors no one and is traveling from building to building on both sides of the lake.

Upstairs downstairs into every classroom and office the maddening noise is not ceasing. Even the Patriot has been smothered. Some reporters possibly even editors have given up without a struggle.

Look around and you will see many symptoms in evidence. The most common ones include:

1. When walking into a room the infectious person slumps into the first available chair while emitting a long deep sigh.

2. A highly contagious person dozes during lectures.

3. Those seen napping in restrooms are hopeless incurable cases. Neither touch nor speak to them for if awakened they have the potential for violence.

4. Being late for class on a regular basis is a sure sign that the fever has gotten a good hold.

5. Turning in homework late is an alarming symptom in students. When a professor takes weeks to grade tests the fever is uncontrollable.

6. Finding people who are staring out windows with glazed eyes is a commonplace sight.

In order to escape this ravenous disease known as Spring Fever several precautions are essential.

Get plenty of rest preferably at home and not in the classroom. Leave ample time for doing homework spending less time watching late movies.

Those who are highly susceptible should take vitamins with iron. Do something extravagant or unusual to chase away any beginning symptoms that the fever is nearby.

It is important to remember that the fever generally lasts only a few weeks. It is also encouraging to know that according to rumors, no lives have ever been lost even among the most infected cases.

Elections draw near...

In the coming months two important election days will be held in Texas: in May Democratic and Republican primaries will select candidates for various state and county offices to represent the parties.

Before those primaries city council and school board elections are held.

April 3 is the day the Tyler Independent School District will hold its school board election.

There are two paces on the ballot this spring and one contest is drawing special interest.

In Place One Elaine Aven Roberson challenges incumbent Myrtle Danes Smith.

Another candidate Jeannette Noble Chandler had filed for the race but withdrew recently. Her reason for dropping out of the election was so she and Roberson would not split the votes.

The election is the first for Smith since the controversial dismissal of Superintendent B. Carnes. Several charges of misconduct were levied against Carnes by school board members. The alleged charges were later deemed to be insufficient grounds for firing Carnes.

Carnes filed a lawsuit against the district for the value of his contract. The TSD school board members later settled out of court with Carnes. The school district had to pay \$295,000 to Carnes.

Roberson is a qualified candidate for the position. She is active in the citywide PTA and other organizations.

Smith is currently president of the school board. When the voters go to the polls, maybe they will remember what the school board has done recently and cast their votes with their pocketbooks and taxes in mind.

Hopefully voters will go to the polling places and cast their ballots in the election with the candidates in mind instead of voting blindly for same person every year.

U.T. Tyler Patriot

The U.T. Tyler Patriot is published at two-week intervals on Monday during the regular academic year, except during examination and vacation periods, in the journalism classes and laboratories of the Department of Humanities and Communication. Opinions expressed are those of student editors and do not necessarily reflect those of the student body, faculty or administration. Offices at the University of Texas at Tyler, 3900 University Boulevard, Tyler, Texas 75701 are located in HPR, Room 261, telephone (214) 566-1471 Ext. 249.

SOUNDS AROUND

By LAURA HUGHES
Staff Writer

Sometimes the adage goes it isn't what one says that is important but what one doesn't say. In the case of this year's Grammy Awards it isn't who won but who wasn't even nominated.

With awards given in categories of music from country to classical the National Academy of Recording Sciences should be able to recognize a wide variety of artists who have significant contributions to music in the

past year. Instead the majority of the selections favored the influence of hard rock.

As host of the televised event John Denver deserves praise for being a mediocre emcee despite the fact that his recording of "Some Days Are Diamonds" one of the year's best songs didn't get a mention.

The awards show also ignored Air Supply a group whose pleasant pop sounds continue to produce chart toppers (current "Sweet Dreams").

Perhaps the greatest sin of

omission, however, was Abba. The Swedish group performs the rarest of combinations—lyrics and melodies that are both consistent in quality and innovative in sound. Their "Super Trouper" proved a bum doesn't have to be either hard or punk to be good rock.

All in all a certain sameness pervaded the Grammy awards again this year as if only the names had been changed to protect the academy's preferences. One wonders why the different drummers went unheard.

The Grammys aren't saying

THIS WEEK'S TOP TEN

ROCK SINGLES

1. "Leader of the Band" Dan Fogelberg
2. "Sweet Dreams" Air Supply
3. "You Could Have Been With Me" Sheena Easton
4. "Love Is A Right Tonight" Rick Springfield
5. "Turn Your Love Around" George Benson
6. "Open Arms" Journey
7. "Take It Easy On Me" Little River Band
8. "Through the Years" Kenny Rogers
9. "I Can't Go For That" Daryl Hall & John Oates
10. "Love on the First Degree" Alabama

COUNTRY SINGLES

1. "You're the Best Break this Old Heart Ever Had" Ed Bruce
2. "Buen Moon with Heartache" Roseanne Cash
3. "Mountain of Love" Charley Pride
4. "Do Me With Love" Janie Fricke
5. "She Left Love All Over Me" Razzie Bailey
6. "Bobbie Sue" Oak Ridge Boys
7. "The Very Best Is You" Charly McClain
8. "B.G. City" Merle Haggard
9. "The Clown" Conway Twitty
10. "Another Sleepless Night" Anne Murray

IRA...

good investment

By LINDA JARVIS
Staff Writer

Beginning Jan. 1 every working person could invest \$2,000 a year in the new Individual Retirement Account (IRA) established by the Economic Recovery Tax Act of 1981. Couples with one working spouse can invest \$2,250 a year.

Technically this will amount to \$1 million in 25 years. But what will that million be worth in actual dollars? At a 10 percent rate of inflation it will equal today's \$90,000 bracket.

The investment is tax deductible and no taxes are due on the earnings until the investor reaches age 59½ and begins withdrawing the money.

Any money taken out before age 59½ is subject to regular taxes plus a 10 percent penalty.

The disabled may withdraw money from their IRA account at any time without penalty.

IRAs are available through private companies, banks, savings and loan associations, credit unions, mutual funds, stockbrokers, insurance com-

panies and the U.S. Treasury department.

There are many questions to consider when choosing a particular IRA investment.

What are the penalties for premature withdrawal?

How often is the interest rate adjusted?

What is the interest rate?

Is there a charge for handling the account?

Is the principal guaranteed?

If the investor should die after beginning annuity payments would the heirs continue to receive payments?

Is there any time when interest would no longer be accrued?

GRATES ON NERVES Nancy Boatright, Tyler senior, puts everything into her work as she grates the edges of her sculpture with a wood file. This form is part of her three-related-forms sculpture.

By MARY HUNTER
Feature Editor

Photos by
MICK BANDY

FINISHING TOUCHES Glenda Pinkerton, Winona senior, puts the finishing touches on her stained glass window she created in the Art in Contemporary Living Class.

Artists marry concept, technique

A band saw buzzes, hammers tap, staccato sounds and wood files grind in rooms at the end of the SCI building.

The workers are not carpenters but sculpture students of Don Van

Horn, award-winning sculptor and member of the UT Tyler art department faculty.

Van Horn said he told the students half in jest, that they were going to learn to build kitchen cabinets.

"I feel sculpture has to be a marriage of concept and technique like any art form," he said. "I hope the technical aspects make it possible."

Since most of the students have never worked with wood or a band saw, he puts a heavy emphasis on the technical process. He is also concerned with the aesthetic. Through a lot of this, a lot is done in the drawing stage before students start on the sculpture. A lot of ideas are worked out beforehand.

Currently the students are each working on a piece of sculpture composed of three sculptured forms that all have relationships to one another. Technically, they are learning to fabricate a hollow shape out of wood, as opposed to carving.

Each student must devise a

system to build the shape wanted for each piece. The surface is put tied and sanded smooth before it is painted a neutral (black, white or gray) color. This is so the shape cannot be enhanced through color to make the shape better. Full emphasis is then given to design.

Van Horn said the students would each complete two pieces of work this semester. The works are more involved than he had anticipated.

"With our minimal equipment and facilities, students sometimes must wait in line and the process goes slowly," he said.

The three rooms occupied in the science building house not only the sculpture students but also Van Horn's Art in Contemporary Living class. In this class, the emphasis is more on the notion of

crafts or design for living environments.

These students are now working on stained glass. The works are more practical to fit into an environment of the students.

A number of art students do not go on to become working, producing artists, professional in the purist sense of the word. This course gives these students something more practical in approach and its application.

Van Horn also teaches life drawing each semester. A classes that he teaches are studio classes except for primitive art history. This summer he will also take a class of graduate students to Italy to study the proliferation of public art in Renaissance Italy. He has traveled extensively in Italy.

NO FALSE MOVES After creating designs on paper, Judy Brown, Athens senior, uses the band saw to cut out the beginning shapes of her sculpture. Since false moves cause a heap of trouble, the students in this sculpture class must have a steady hand and good eye.

COLLABORATION Sandra Tucker, Gilmer senior, and Don Van Horn, member of the art department faculty, discuss her design before she cuts the glass for a stained glass window in Art in Contemporary Living Class.

PRESS CLUB RECIPES By JUDY ADAMS

Cream Cheese Squares

- Combine1 stick softened oleo
1 egg
1 box yellow cake mix
Pat in a 9 by 13 inch pan.
- Combine1 8 oz. pkg cream cheese (softened)
3 eggs
1 lb box powdered sugar
1 t vanilla
Pour over first mixture Sprinkle
pecans over top
- Bake at 350 degrees for 35 minutes

Winning problem for Dallas Mavs

By PHIL HICKS
Staff Writer

To win or not to win is the question that the Dallas Mavericks and their fans are pondering this season.

As victories by the vastly improved Mavericks mount, the visions of a number one draft choice and Virginia's Ralph Sampson fade away.

Currently the Mavericks are not even close to having the worst record in the NBA. That dubious honor goes to the Cleveland Cavaliers and the San Diego Clippers.

But how can you tell a young team whose coaches and players have won everywhere they have been to lose basketball games?

Coach Dick Motta is a proven winner with one NBA Championship with the Washington Bullets. He also finished second in the championship series another time with the Bullets and he led the Chicago Bulls into the playoffs several times.

Norm Sonuga, general manager of the Mavs, has assembled a great wealth of talent for the second year expansion team.

Last year's draft garnered Dallas four outstanding young players. The four players have become known as the "Super Rookies."

Wayne Vincent of Michigan State has been the surprise of the league. He was recently named the NBA player of the week. He was the first rookie to obtain the award this season. Vincent, who was a second round draft pick, should be seriously considered as rookie of the year.

As a sophomore for MSU, Vincent along with Magic Johnson helped the Spartans to the NCAA Championship with a win over Indiana State.

The reason that Vincent has been able to show his "in your face" stuff is because the NBA's number one draft choice of 1981, Mark Aguirre, sustained a broken bone in his foot.

Aguirre has been out for over two months and has just started back playing again.

Aguirre, who is destined to be a superstar along-side Larry Bird of the Celtics and the Sixers Julius Erving, led the DePaul Blue Demons to the NCAA Final Four as a freshman. After sensational sophomore and junior seasons at the Chicago school, Aguirre decided to declare hardship and opted for the NBA bucks.

Another of the "Super Rookies" is Kansas State's Rolando Blackman. Blackman has played small forward and off-guard for the Mavs. Although Blackman does not start every game, he has contributed greatly to the Mavericks' good fortune.

The final top ranked first year player is Eston Turner. Turner is a graduate of Mississippi. He splits time with Blackman for the Mavericks.

These rookies have formed a chemistry that has mixed well with the team's veteran players, Brad Davis and Allan Bristow, and the other Dallas players have worked hard to produce an exciting and fast-paced style of basketball.

The fans have responded to the Mavericks' brand of roundball. Reunion Arena has shown an increase in attendance of about 2000 per contest.

Dallas fans have been known for only supporting winners, but they have come out and attended the Mavericks' games.

The way the front office is building the Mavs, they will surely become an NBA powerhouse. Sampson or not, the Mavericks organization is taking a similar course of action as did the Dallas Cowboys, which involves the draft.

If the Mavs continue this path, then their fans will become just as wild about basketball as they have about America's Team.

Researcher tries for district award

By LAURA HUGHES
Staff Writer

WINGED ZEBRAS These zebra finches were part of a recent project on campus

An academic year's worth of research on the UT Tyler campus will be presented at the Beta Beta Beta Southcentral Regional Convention April 2-4 at Lake Texoma.

Senior biology major Fred Kersh will report his findings in a 10-minute slide program on "The Variables Affecting Reproductive Efforts In the Zebra Finch."

Kersh competes with 25-30 other undergraduates from Texas and Oklahoma for the Frank G. Brooks District Award named for Beta Beta Beta's founder. Last year's winner was UT Tyler's Steve Rydzak from Lindale. The purpose of the research

project was to determine how the birds spend their reproductive energy.

"They have a certain amount of energy with which to reproduce. Either they have as many young as possible with less energy to care for them, or they have fewer young and give more energy to their care," Kersh said.

The zebra finch was selected for its hardiness and availability, he said.

Popular because of its many color variations, the bird can be bought at any pet store.

Kersh began his research last summer with the help of biology faculty member Dr. Neil Ford, continuing giving 10-12 hours each week since then to the care and

study of the Australian birds. Kersh and Ford recorded their observations of some 80 birds during the project.

"We took data, for instance, on the number of eggs per clutch, the weight of each egg, how the birds fed and maintained their young, and how many young survived," said Kersh.

A computer print-out allowed him to plot and correlate 10 variables over the results of which he will present at the convention.

"The possibilities for future research using the same birds are endless," he said.

Kersh will graduate in May and hopes to enter Texas College of Osteopathic Medicine in a year.

Grad student wins with John Paul Jones

By TERRY SHIRLEY
Staff Writer

If at first you succeed, then try again.

Vick Lefevre, graduate student and wife of Dr. Stephen Lefevre, political science faculty member, has the lead article in the 1982 Volume 1 of "Touchstone," the Webb Historical Society journal.

The story begins last spring when she was Vick Parker and an undergraduate student in Dr. Vincent Fazio's Historical Methods and Research class. She wrote a paper titled "John Paul Jones and the Battle of Flamborough Head."

In April, she heard about a contest through the history department that the Webb Historical Society and Phi Alpha Theta Society were sponsoring. After revising and changing the name of the paper to "Fame and Accomplishment in the Early Naval Career of John Paul Jones," she entered it in the contest.

She won and got \$100 prize money.

"Originally they were going to give two \$50 prizes, one to an undergraduate and one to a graduate student, but no graduate student entered a paper," Mrs. Lefevre said.

"So they combined the money and gave one \$100 prize," she added.

In the fall, as winner of the essay contest, she was asked to submit her paper to the "Touchstone."

"Touchstone" is the journal of the Walter Prescott Webb Historical Society. It is published annually by the Center of American Studies Education at East Texas Baptist College in Marshall.

"I never really knew what sort of journal it was, except that the Webb Historical Society published it and that they were more interested in stories related to Texas history," Mrs. Lefevre said.

Because of this, she was surprised when Dr. Frank Smyrl, history faculty member, notified her that the essay was the lead article of the first volume of "Touchstone" for 1982.

The paper tells the story of John Paul Jones, the Scottish merchant seaman who came to America and proclaimed himself an aristocrat.

She gives a brief history of his life, goes through his tour of duty with the Continental Navy, tells how he gained lasting fame as a naval hero of the Revolution with the famous Battle of Flamborough Head, and finishes with an afterthought.

"Many of his exploits at sea were comical, so what I did for a

thesis was show that even though he gained fame as a Revolutionary hero, his wartime activities were not strategic to the war," Mrs. Lefevre said.

His exploits were like something out of fiction," she added.

Recently, she has entered the paper at UT-Arlington in the E. C. Barksdale Student Paper Competition.

"We did a lot of traveling in the Deep South when I was young," she said.

"Every summer we traveled to Alabama and stopped for one day at Vicksburg. The atmosphere and historical feeling were attractive to me," she added.

She later realized her interest in history was not limited to the Civil War.

"So when I went to college after high school, history was the only thing I could imagine majoring in," Mrs. Lefevre said. "I was unaware of other possibilities."

She is presently working on a paper on contemporary Iraq.

"I would like for it to develop into something that is publishable," she said.

"I hope I can turn the paper into a study of the role of the military government as an organizing force in the country," she added.

Pulse beat

The old saying "There is nothing new under the sun" is really true. However, there is a lot that man has not yet been able to discover. Stress is something we have discovered, but it is nothing new.

We have all experienced stress for years. The earliest caveman experienced stress, but unlike modern man, he was not clever enough to know that he was under severe stress, so he did not worry about it.

Unfortunately, modern man has discovered stress, and he has definitely begun to worry about it. Now that we have discovered that we are a subject to stress, it is time we started discovering what to do about it, said Dr. Richard Tyler, Tyler general practitioner.

Reactions come and go and respond to what's happening now.

Each of our feelings serves a positive function in taking care of us. It's our body's way of telling us what we need. Some people save up feelings until they cannot contain them any longer.

When this happens, usually we dump our saved-up feelings on the person nearest when we reach the breaking point. Many times this can cost us a good relationship or maybe even cost us a job.

You may have relieved your stress, but at what cost?

The positive functions of feelings are:

- 1 Anger gives me power
- 2 Fear tells me I need to protect myself
- 3 Sadness tells me I have lost something
- 4 Excitement I have energy
- 5 Joy I'm available for intimacy

Two of the most common and most stressful habits you are likely to encounter are afterburn and reachback. Both of these terrible habits come about because people forget a very simple principle of life.

You cannot go backward in time and change even the slightest thing that has already happened. The past is only valuable to you as memories and as lessons you have learned.

It is very important that you have at least one person in your life you feel you can trust and talk to. Your social environment may include many people in a variety of settings.

Coed rising star of stage

Some girls have it all: beauty, brains, talent, and ambition. Amy Motes is one of those lucky people. She sings, dances, and stars in both dramatic and musical productions.

A 20-year-old junior at UT Tyler, Amy divides her time attending classes half a week, and performing at the Southern Palace in Six Flags half a week. She'll be appearing in the musical production "America," which opens this spring in Arlington.

Amy grew up in Tyler. She attended Robert E. Lee High School as an honor student and was active in music and drama. In her senior year, she won the East Texas Junior Miss Pageant's overall vocal talent award when she sang "Come in From the Rain."

Later that year, she auditioned

for a job as a singing waitress at the Appletree Smokehouse and with the same number landed the job. She now considers it her theme song.

While entertaining is her first love, Amy intends to complete her education. She attended Tyler Junior College after graduating from high school to pursue a degree in Radio, TV, and Film Communications.

In her second year at TJC, she applied for and won a scholarship to the American Musical Theatre in Petosky, Michigan. There she became a "Young American" and had the opportunity to be active in Summerstock. Amy had the lead in such productions as "Showboat," "Jesus Christ Superstar," and was soloist in "A Tribute to Richard Rodgers."

After returning from Michigan in August, she toured with the Young American Dance Company to New York and Detroit. For two exciting

weeks, they performed 14 shows to audiences of 15,000. Liberace was the featured entertainer. Liberace: He made me feel com-

"It was such a thrill to meet him. His dressing room was a ways open to the Young Americans," Amy said.

Following the tour, Amy left for California to become a resident member of the company. There she attended the theatre workshop at Fulerton until December. She starred in "Cat on a Hot Tin Roof," "The Miracle Worker," and "Vanities."

Amy relishes her experiences of the past year and is looking forward to future opportunities. Why do things happen for her? For one thing, she has talent. But most important, she has the determination and drive to pursue her ambitions and achieve her goals.

See you at Six Flags this summer, Amy!
